Is A Maintenance Agreement A Good Investment?

We are often asked if investing in a Armstrong Service Agreement Plan (ASAP) is a good idea. Absolutely

it is! Regular maintenance is one of the most cost-effective ways to maintain comfort, increase efficiency (saving you money on your utilities) and help ensure your systems are in optimal working order to promote longer equipment life. Plus, our professionally trained service technicians will keep an eye out for potential problems before they become big ones and look for more ways to improve your comfort and efficiency.

Nothing empowers a consumer like having choices because one size definitely doesn't fit everyone. That's why Armstrong Plumbing, Air & Electric has revolutionized our Armstrong Service Agreement Plan (ASAP). Now, you have the choice of five different plans to fit your needs and your budget.

WHAT IS COVERED?	BASE PROTECTION	PRIME PROTECTION	SIGNATURE PROTECTION	PRESTIGE PROTECTION	ROYALE PROTECTION

- Water Heaters - Tank & Tankless

Electric:

- Additions & Remodeling
- Electrical Safety Inspection
- Generators
- GFCI Installation
- Interior/Exterior Lighting
- Panel Replacement
- Smoke & Carbon Monoxide Detectors

ALERT: BANNED IN 2020

If you have an air conditioner or heat pump that is 10 years or older, you may have a system affected by this ban from the EPA.

R-22 refrigerant is banned from production and importing as of January 1, 2020. This supply will be drastically reduced, which will dramatically increase repair costs. It is a good possibility your system uses R-22 if it is at least 10 years old. **NOW is the time to plan for replacement!**

The only available supply is from what already exists or has been recycled. The dwindling supply means prices (already very high) will skyrocket with the demand if you need to have R-22 refrigerant added to your cooling system. Armstrong Plumbing, Air & Electric is dedicated to ensuring all our customers are aware of these changes and to weigh all options of repair vs. replacing equipment. Call our office to schedule your no-obligation estimate or ask your technician for more information during your service call.
